

Summer School ERASMUS Intensive Programme

Structural Architectures - Geometry, Code and Design

September 1st - 11th 2012 in Kaiserslautern, Germany

International workshop in English language with students and professors from
Politecnico di Milano, Italy | San Pablo CEU University Madrid, Spain | ETH Zürich, Switzerland | Technische Universität Kaiserslautern, Germany

Structural thinking as a method for designing architecture by formulating rules based on structures is the background of the Summer School's topic. This year, we are going to focus on structural parametric design of an architectural object in international teams. Workshops will prepare the design processes, visualization and model making. Excursions to Frankfurt and Stuttgart will complete the programme.

Interested students in the 4th year of studies or later are asked to send two PDF-files comprising (1) a letter of motivation (English) and (2) a transcript of former courses to the local coordinators:

Politecnico di Milano	luigi.cocchiarella@polimi.it
Universidad CEU San Pablo Madrid	mghipola.eps@ceu.es
ETH Zürich	dillenburger@hbt.arch.ethz.ch
Technische Universität Kaiserslautern	cornelie.leopold@architektur.uni-kl.de

For participation with preparation and post-processing: 4 ECTS

The Summer School is funded by EU:
accommodation in apartments and 90% of real travel costs to Kaiserslautern.
